

Convention Internet

Service and
Satisfaction
That's Second
to None

bandwidth availability

Up to 1 Gig of Internet access is dedicated EXCLUSIVELY to the convention space. This bandwidth is completely customizable and can be scaled to meet your event needs on every level.

corporate-class service

Our 100% Cisco backbone is optimized to ensure reliable and redundant paths, providing continuous uptime for wired and wireless (A/B/G/N/AC) service. Each meeting room is ready with multiple wired network ports, and dedicated wireless access points.

support

Exceptional network assistance is available 24 hours a day/7 days a week/365 days year. Every customer works with a highly knowledgeable XpoNet Technology Coordinator, ready to build the best solution needed for any event, and advanced real-time monitoring and reporting tools give XpoNet the ability to proactively manage all your data requirements.

experience

We've been providing Internet service within the event industry for over 20 years. Specializing in the support of technology-based events; our expertise includes the successful execution of meeting space Internet for some of the largest technology companies across the globe (including Citrix, IBM, RSA Security and Symantec, to name a few).

guarantee XpoNet is the only Internet provider to put a "full refund" guarantee on the Internet uptime during your event. If the overall connection to the Internet should be unavailable for more than 30 minutes during show hours, XpoNet will extend a full refund.
